

Open Time Trading with the Codes

Prepared by AFA Council 30 ANC Officers and Scheduling Chair

When Trading think of the trips in OT being in two buckets.
YOU CANNOT MIX THE TWO BUCKETS!

Bucket 1: TO / DD (& CP)

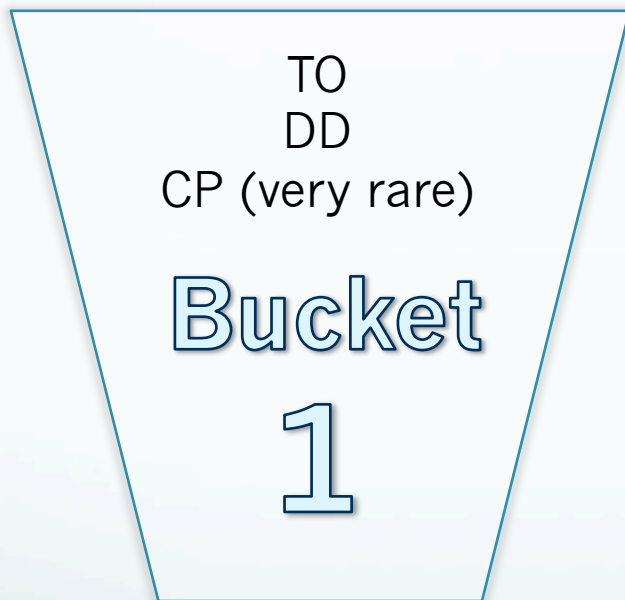

Trips with these codes can be:

- UP TRADED ↑
- DOWN TRADED ↓
- SIDEWAYS TRADED ↔

TO/DD (& CP) must be the same day(s) of departure as your trip(s).

Even if every day of your trip(s) is greyed out you can still trade into TO/DD (& CP).

Key: The OT trip(s) that you are trading into must start on the same day(s) as the trip(s) on your line.

Bucket 2: TX / No Code

Trip(s) with these codes can be:

-UP TRADED ↑

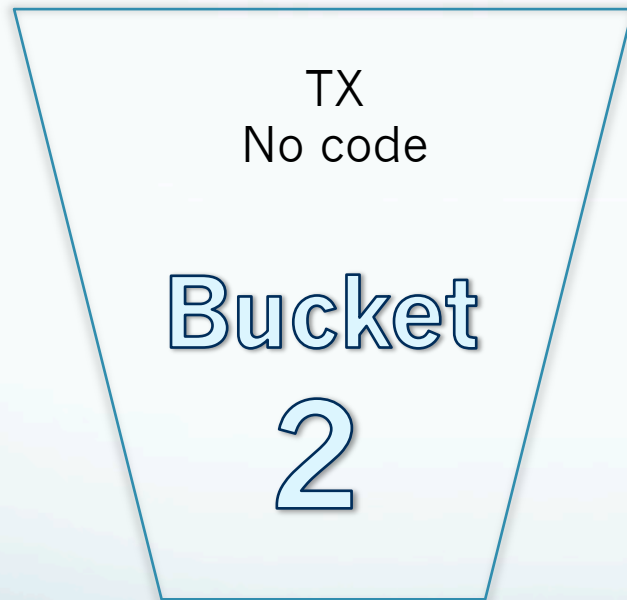

-SIDEWAYS TRADED ↔

Must be:

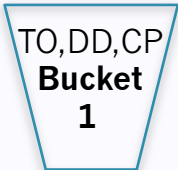

- **Day for day or greater,**
- **Cover the same calendar days, and**
- **(Multiple trades only:) Each trip traded into OT must be the same length or shorter than the shortest TX/No code trip in that trade.**

Example: Your two 2-days ↔ one TX 4-day = ✓ OK (if same calendar days)

Example: Your 4-day ↔ two TX 2-days = ✗ DENIED (giving longer trip length to OT)

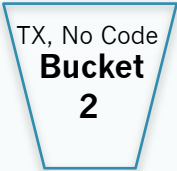

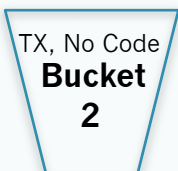

When Doing Multiple Trades

Your trips \Leftrightarrow  +  = ✓ OK

The diagram shows two identical trapezoidal buckets. Each bucket contains the text 'TO,DD,CP' at the top, 'Bucket' in the middle, and the number '1' at the bottom.

✓ Same days of departure as your trips.

Your trip(s) \Leftrightarrow  +  = ✓ OK

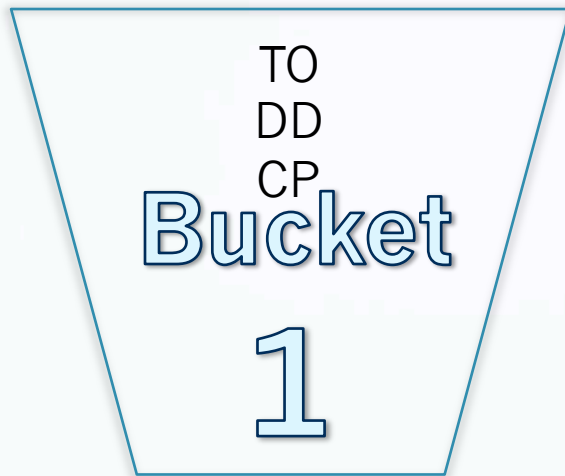

The diagram shows two identical trapezoidal buckets. Each bucket contains the text 'TX, No Code' at the top, 'Bucket' in the middle, and the number '2' at the bottom.

- ✓ Day for day or greater,
 - ✓ Cover the same calendar days, and
 - ✓ Can't give a longer trip to OT than the shortest trip being taken out.
-

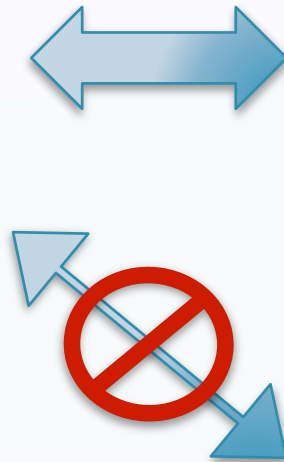

Your trip(s) \Leftrightarrow  +  = ✗ DENIED

The diagram shows two trapezoidal buckets. The left bucket contains 'TO,DD,CP', 'Bucket', and '1'. The right bucket contains 'TX, No Code', 'Bucket', and '2'.

Review

- ✓ Same day(s) of departure.

- ✓ Day for day or greater,
- ✓ Cover the same calendar days, and
- ✓ Can't give a longer trip to OT than the shortest trip being taken out.
